

SWETHA S

PRODUCT DESIGNER

swethaseyavelu@gmail.com | 9498828876 | Coimbatore, Tamil Nadu

SUMMARY

Product Designer transitioning from a client-facing healthcare claims role into product design, backed by a Google UX Design Professional Certificate and multiple hands-on product design projects spanning research, information architecture, wireframing, and high-fidelity UI in Figma. Combines strong user empathy and attention to detail with a year of stakeholder communication and process-improvement experience, translating user and business needs into clear, well-reasoned design decisions.

CORE SKILLS

Product Design Process: User Research, Personas, User Flows, Information Architecture, Wireframing, Prototyping, Visual & UI Design, Responsive Design, Usability Principles

Design & Prototyping Tools: Figma, Antigravity, Claude, Google AI Studio, Canva

Cross-Functional Skills: Stakeholder Communication, Client Empathy, Process Analysis, Problem Solving, Attention to Detail, Multi-tasking, Teamwork

PRODUCT DESIGN PROJECTS

Butterfingers — Home Bakery Mobile App

- Led end-to-end product design for a home bakery ordering app, taking the concept from problem framing through high-fidelity UI to translate a small business's operational needs into a usable digital product.
- Conducted user research and defined personas and user flows to uncover pain points around scheduling and delivery tracking, using the findings to shape the product's core feature set.
- Designed and prototyped the full experience — product catalog, cart, checkout, and order tracking — as an interactive Figma prototype, using Google AI Studio to speed up ideation.

Neighbour to Neighbour — Hyperlocal Tool-Lending App

- Designed a hyperlocal product concept that reframes idle garage space as a shared community toolbox for borrowing and lending tools.
- Mapped end-to-end lender and borrower journeys and designed the core product flows — listings, nearby search, borrow requests, and a trust/rating system — to build user confidence.
- Built wireframes through high-fidelity UI in Figma, using Claude and ChatGPT to accelerate research and ideation.

Fresh Track — Product Expiry Tracking App

- Designed a mobile product concept to track expiry dates on household and grocery items, aimed at reducing waste and missed usage.
- Defined key flows for adding items, setting expiry reminders, and reviewing an at-a-glance dashboard, prioritizing scannability and fast data entry.
- Built wireframes and high-fidelity UI in Figma with a focus on everyday usability.

Toy Traders — Responsive Website for Toy Exchange

- Designed a responsive web product for exchanging, selling, and buying toys, supporting a more sustainable, secondhand play cycle.
- Designed listing, browse/search, and exchange/purchase flows with responsive layouts across breakpoints.
- Built wireframes and high-fidelity UI in Figma, ensuring a consistent experience across devices.

PROFESSIONAL EXPERIENCE

Client Partner, Claims Management — Access Healthcare, Coimbatore

Oct 2024 – Jan 2026

- Managed end-to-end healthcare insurance claims processing daily, ensuring accuracy and timely resolution within strict SLA targets — building habits of precision that now carry over into design QA and detail-oriented UI work.
- Served as primary point of contact for client communication, translating business requirements into clear, actionable steps — a direct precursor to translating user needs into design requirements.
- Identified recurring process bottlenecks and proposed workflow improvements, and resolved escalations cross-functionally while maintaining close attention to detail on high-volume, sensitive data.

CERTIFICATIONS

Google UX Design Professional Certificate — Coursera, April 2026

EDUCATION

B.Sc. Mathematics — Hindustan College of Arts and Science, Coimbatore (Bharathiar University) • CGPA: 7.5, 2021

HSC — Adharsh Vidhyalaya Matric Hr Secondary School, Erode (State Board) • 78%, 2018

SSLC — Adharsh Vidhyalaya Public School, Erode (Central Board) • CGPA: 10, 2016
